Cut-off wheels with universal bore
for rails

Cut-off wheels with universal bore for rails

This wheel has been developed specially based on specifications for cutting rails. Despite extreme application conditions, such as humidity, cold and temperature fluctuations, the rail cut-off wheel from TYROLIT offers short cutting times coupled with minimal effort. Exceptionally clean, non-discoloured surfaces reduce reworking tasks and working times. Additionally, this disc has an included reduction bushing that enables the product to be mounted on machines with 20 mm and 25,4 mm spindles.

Developed for use on manual cut-off machines with electric or petrol engines. Suitable for pure off-hand and guided off-hand applications.

Application
Rail cutting with petrol cutting saw

+ **Integrated reduction bush enables use on machines with 20 mm and 25.4 mm spindle**

+ **Hard specification for increased lifetime and improved cutting performance**

+ **Cleanest surfaces without any discolouration reduce rework and working times**

+ **Very comfortable working without great effort**
